Apollo xp95 addressable smoke detector pdf

Apollo xp95 addressable smoke detector wiring diagram. Apollo xp95 addressable smoke detector pdf.

55 000-600APO The XP95 optical smoke detector uses the principle of light dispersion³ to quickly and effectively detect a range of slow and burning fires. Reliable fire detection³ areas with a wide temperature range from -20°C to +60°C Ideal for evacuation times³ Not affected by wind and atmospheric pressure³ Insect-resistant display Specifications Guarantee 10 Apps Evacuation routes³ Hotels Offices Restaurants Medium to large Bedrooms Type Slow fire, Smoking Color White Setting³ n of the optical³ Horizon sensor housing infrared emitter and sensor, arranged radially to detect light scattered forward. Weight 105g Materials polycarbonate housing Materials terminals Stainless steel plated in nickel Product length 42mm Product diameter 100mm Detection principle³ n Disperse³ n photothe light's metric. Product length 1.65in Product diameter 3.94in EN standards 54-7 Approvals Anal³ nominal value 25 Anal³ value (- tolerance) 7 AnaI³ value (+ tolerance) 7 AnaI³ value 25 +7/7 Alarm level AnaI³ value 55 Chevron Protocol type voltage 5 to 9V peak Protocol tensi³ n (mA x) 9V Protocol tensi³ n (min) 5V Power current 1mA Maximum Power On Time 4 seconds Status Indicator³ Reduced Alarm Status Indicator³ Red³ Quiet Current³ 340A³ 1³ Quiet Current³ 4 Quiet Current³ 4 seconds Power Supply Tensi³ n (mAix) 28V cc Power Tensi³ n (min) 17V cc Power Tensi³ n (Vmin-Vm³ix) 17 to 28V cc Terminal Functions L2 +L2 Loop in & out positive Terminal Functions L1 in -L1 Loop in & out, double terminal Terminal functions +R +R Remote indicator Conexi³ n positive Terminal functions -R -R Remote indicator Conexi³ n negative Polarity L1 and L2 are polarity insensitive Powered by bater³ a No Sampling frequency Once per second Humidity (m³ix) 95% RH Humidity (min) 0% RH Non-condensing Note Humidity o Humidity 0% to 95% (without condensation or glazing) Operating temperature -20 to 60°C Operating temperature (max) 60°C Operating temperature (min) (min)Storage temperature (max.) 80°C Storage temperature (min.) -30°C Storage temperature -30 to 80°C Wind speed effect None Operating temperature -4 to 140°F Operating temperature (max.) 140°F Operating temperature (min.) -4°F Downloads This page uses Javascript, you will have to turn on JavaScript to view the page. Filter by: All Apollo Humo Detector Apollo Discovery Apollo XP95 Sort by: Best sellers alphabetically: A-Z Alphabetically: Z-A Price: Low at High Price: Highest to Small Date: New to Previous Date: Fire Trade Supplies team has assembled a collection of Apollo Addressable Smoke Detectors including Apollo XP95 optical analog smoke detector, optical smoke detector as well as optical store discovery We offer free delivery the next day on all orders over £100, as well as exceptional customer support and advice. Just call 0330 056 3094 or ask a question using our chat feature on the website. Who we are: Fire Trade Supplies is one of the leading fire alarm systems suppliers in the UK buck s (United Kingdom). We provide fire alarm systems and associated products from the following fire alarm brands: Apollo, Gent, Ziton, Vesda, Morley, Advanced, Eaton, Kentec, Hochiki, KAC, Fullon and many more. We supply fire alarms installers with directional and conventional fire alarm systems, as well as emergency lighting, call systems, disabled shelters, batteries, locks and fire alarm testing equipment. 55000-600 Summary Characteristics Specification DownloadsSmoke³ Apollo XP95 is part of a new advanced range of anal³ gical addressable smoke detectors. Easy to install and high performance, this smoke detector has many excellent features. Smoke detection³ this detector is performed via an internal pulsing LED a photodiode with an obtuso angle regarding the luminous source. The LED emits a collided light burst every second, due to the alignment of the photodiode this is not recorded when the atmosphere is cleared (the photodiode even has a diurnal light block filter to remove false alarms). If the smoke enters the detector chamber, the LED light flow is dispersed by the smoke particles, allowing the diode to capture a luminous signal and trigger an alarm. The XP95 optical smoke detector digitally transmits the alarm signal to the control panel of the directionable fire alarm system. In full compliance with EN54 standards and regulations, this device, together with the entire Apollo XP95 range, has been rigorously tested to ensure that it meets both safety standards and modern environments. This detector has the same external housing as the ionization smoke detector, distinguished by the light LED that becomes red in an alarm. Key Features Alarm flag for quick alarm reports. Alarm address for the rapid location of the alarm. XPERT 7 Card address. Electronics free base. Easy installation. Elegant design. XP95, Discovery and CoreProtocol compatible. It responds well to the fires that burn slowly. Very suitable for bedrooms and escape. It is not affected by wind or atmospheric pressure. Specifications Sensor: PIN silicon photodium Emisor: LED Infrared GaSampling frequency: 1 second Power cable: 2 power cables, insensitive to the polarity Power voltage: 17 to 28 V DC Rest current: 340I/4A medium, 600I/4A power peak Power current: 1mA alarm levelIP rating: 23D Dimensions: 100 x 42 mm (100 x 50 mm at the base) Weight: 105g (157g at the base) Detector housing: white polycarbonate Terminals: nickel-plated stainless steel Downloads Downloads Downloads Downloads
